

MODERN BATTERY SOLUTIONS

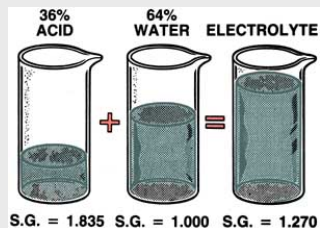

has mobile battery services that will recondition your batteries with the same advance technology used by our US military. It is safe, easy and reverses the harmful effects of sulfation.

THE DYNAPULSE 248™ also eliminates acid stratification which is a leading cause of battery failure. In fact 80% of all batteries fail prematurely due to sulfation related issues.

We will help you to achieve increased power and extended life from your batteries. Proper care and maintenance practices eliminate harm caused by unintentional negligence.

Download the "Proper Battery Care" brochure from our website **FREE!**

We will even adjust your batteries electrolyte levels when needed.

All Battery Techs are HAZMAT Certified!

We offer **US MILITARY PROVEN TECHNOLOGY** in Battery Recovery Equipment and Services that will Drastically Improve Your Battery's State of Health ...

Damaged Battery Cells Do Not Apply!

THE DYNAPULSE 248™ Works Fast with a US Patent Pending low frequency **pulse technology**.

This technology **targets** and **safely shatters sulfation** that accumulates on the lead plates of your battery during the normal charge/discharge cycles. **Sulfation Accumulation** typically causes batteries to loose power and cause your EV's to become sluggish.

Removing the sulfate crystals and returning them to the electrolyte with **THE DYNAPULSE 248™** restores the battery back to a **renewed state of health**. **Sulfation Removal** increases your battery's Cold Cranking Amps/Load Capacity to 80%-90% and Lengthens the Life and Strength of your batteries. **Guaranteed!**

On-Going desulfation maintenance with the **patented PowerPulse** helps keep battery plates clean, so your battery works better. Batteries will maintain a greater reserve capacity to recharge faster and release more of its stored energy. With more available energy, your battery lasts up to three times as long between charges, and your electronic accessories work better.

For Appointments Call our Main Offices
(714) 248-9288

36 Volt Cart Battery Service: \$175.00

48 Volt Cart Battery Service: \$200.00

Golf Cart Fleet Rates: \$100.00 Per Golf Cart

Reconditioned Battery Replacements

6 Volt: \$55.00 each

8 Volt: 65.00 each

New Batteries: 6 & 8 volts \$110.00 each

Forklift Battery Desulfation Services

24-Volt \$450.00 36-Volt \$575.00

48-Volt \$650.00 **Fleet Rates Available**

THE DYNAPULSE 248™ Recovers Sulfated Batteries FAST!

(Within a Few Short Hours)

Restores Battery Power and Capacity by removing sulfate crystals from the battery plates and returning them to the Electrolyte solution where they are transformed back into active H2SO4.

The patented PowerPulse then keeps those plates clean and allows your batteries to maintain their capacity and can increase battery life up to 5X. **The patented PowerPulse** generates an intermittent, optimized high frequency pulse that reduces existing sulfate deposits in 3-6 weeks and keeps them from building up again.

For Fast Battery Recovery with Long Lasting Results we recommend clients to have a Fast Desulfation service with **THE DYNAPULSE 248™** and the installation of **The patented PowerPulse** battery maintenance system. This combination is a one-two knock-out punch to eliminate sulfation build up in your batteries and increase battery life up to 5X.
